

Matheus dos Reis de Jesus

iOS Engineer | Porto, Portugal

+351920387699 | matheusdrdj@gmail.com | <https://linkedin.com/in/reisdev> | <https://github.com/reisdev>

Summary

Senior iOS Engineer with 5+ years of experience shipping high-scale fintech and e-commerce apps. I specialize in SwiftUI adoption, modular architectures, and fast, reliable CI/CD. Across multiple codebases, I have raised automated test coverage, cut build times in half, and shipped features used by millions of users in production.

Key Achievements

- Managed modularization and SwiftUI adoption across multiple legacy codebases.
- Mentored 20+ engineers on iOS architecture and development practices.
- Increased test coverage to 80% with different testing strategies.
- Reduced CI build and release times by 50% through pipeline optimization.

Experience

Senior iOS Engineer – KWAN

Mar 2024 – Present

Full-time

Remote, Portugal

- Drove the adoption of SwiftUI for new features while maintaining interoperability with UIKit.
- Increased automated test coverage to 80% through a mix of unit, UI, and snapshot tests.
- Integrated GraphQL APIs and third-party SDKs, including Objective-C and KMM modules.
- Optimized CI/CD pipelines using xcodebuild, caching, and SPM, reducing build and release times by 50%.

Senior iOS Engineer – Zup Innovation

Jan 2024 – Mar 2024

Consulting

Remote, Brazil

- Migrated 2 shared features from CocoaPods to Swift Package Manager.
- Integrated Firebase Performance and Crashlytics, enabling performance improvements across 2 apps.
- Enabled multiple development teams through documentation and technical mentoring.

Senior iOS Engineer – Boost IT

Aug 2023 – Dec 2023

Consulting

Remote, Brazil

- Modernized 2 legacy Objective-C features, introducing testing and improving maintainability.
- Increased test coverage for 3 features using unit and snapshot tests, boosting reliability and catching regressions earlier in development.
- Refactored an advertising feature to improve data quality, contributing to campaign revenue growth.

iOS Mentor – Devpass

Apr 2022 – Apr 2023

Contractor

Remote, Brazil

- Led simulated development sprints for mixed-experience cohorts of engineers.
- Mentored 20+ developers on architectures, RxSwift/Combine, and best iOS development practices.
- Provided one-to-one coaching on Swift, MVVM architecture, and scalable application design.

iOS Engineer – Inter Co (40M+ users)

Nov 2021 – Aug 2023

Full-time

Remote, Brazil

- Owned end-to-end delivery of iOS features using MVVM, Clean Architecture, modularization, and RxSwift.
- Implemented a Twilio-based video conferencing feature, providing insights on design and UX.
- Identified and resolved memory leaks using Instruments, reducing startup time and improving stability.

iOS Engineer – Dimensa

Jun 2021 – Oct 2021

Part-time

Remote, Brazil

- Maintained the distribution pipeline for 4 apps using Bitrise and Fastlane, reducing friction and speeding up releases.
- Introduced security measures, including jailbreak detection and runtime protections.
- Contributed to the adoption of the PIX payment system across 4 apps, ensuring compliance with legal requirements.

Education

Bachelor's Degree in Computer Science

Mar 2016 – Apr 2022

Federal University of Viçosa, Brazil

Languages

Portuguese – Native

English – Fluent

French – Basic

Skills

iOS Development

Swift, SwiftUI, UIKit, iOS SDK, Combine, RxSwift, Swift Concurrency, programmatic UI

Mobile Architecture

MVVM, TCA, Clean Architecture, Modularization, KMM/KMP

Networking & APIs

GraphQL, REST APIs, caching strategies

Testing & Quality

Unit testing, UI testing, snapshot testing, test automation, XCTest

Observability & Monitoring

Firebase Performance, Crashlytics, New Relic

CI/CD & Tooling

Bitrise, Fastlane, GitHub Actions, xcodebuild, Swift Package Manager (SPM), Buck

Security & Performance

SSL pinning, Keychain, jailbreak detection, Instruments, Core Data
